Chapter 5

Traditionally, network analysis, architecture, and design have been based on developing and applying a set of rules for the network. In developing a set of rules, an individual may draw from personal experience as well as from general rules such as the 80/20 rule (where 80% of a network's traffic is local and 20% is remote) or the adage "bridge when you can, route when you must" (bridging ...
