Code Switching Languages In Contact

Code switching (also code-switching, CS) is the practice of moving back and forth between two languages or between two dialects or registers of the same language at one time. Code switching occurs far more often in conversation than in writing. It is also called code-mixing and style-shifting.

Code Switching Definition and Examples in Language

In linguistics, code-switching or language alternation occurs when a speaker alternates between two or more languages, or language varieties, in the context of a single conversation. Multilinguals, speakers of more than one language, sometimes use elements of multiple languages when conversing with each other. Thus, code-switching is the use of more than one linguistic variety in a manner consistent with the syntax and phonology of each variety.
