### **The Theory of Evolution | MindMeister Mind Map**

Scientists talk about evolution as a theory, for instance, just as they talk about Einstein's explanation of gravity as a theory. A theory is an idea about how something in nature works that has gone through rigorous testing through observations and experiments designed to prove the idea right or wrong.

### **Theory of Evolution | National Geographic Society**

The theory of evolution is a scientific theory that essentially states that species change over time. There are many different ways species change, but most of them can be described by the idea of natural selection. The theory of evolution through natural selection was the first scientific theory that put together evidence of change through time as well as a mechanism for how it happens.
