Desert Ecology

Desert ecology is the study of interactions between both biotic and abiotic components of desert environments. A desert ecosystem is defined by interactions between organism, the climate in which they live, and any other non-living influences on the habitat.

Desert ecology - Wikipedia

Unlike books that merely identify what plants and animals live in the desert, Desert Ecology is a comprehensive but accessible introduction to how these organisms live where they do. Beginning with an overview of the Intermountain, Mojave, Sonoran, and Chihuahuan Deserts, Sowell presents the topographic and the meteorologic conditions that created these regions.
