Design Of Portal Frame Buildings 4th Edition

The major components of a portal frame building are a series of parallel portal shaped frames as the major framing elements. Each frame is rigid, and resists horizontal wind forces and gravity loads in the plane of the frame by flexural action. The new 4th edition has been almost completely rewritten to account for changes in the loading codes particularly the new wind code, the availability of new purlin and girt sections and ASI's publication of new connection manuals.
