LoadRunner is a software testing tool from Micro Focus. It is used to test applications, measuring system behaviour and performance under load. LoadRunner can simulate thousands of users concurrently using application software, recording and later analyzing the performance of key components of the application.

LoadRunner - Wikipedia

HP LoadRunner The HP LoadRunner is one of the most recognized performance testing tools. It revitalized performance testing by adopting testing methods on virtual machines instead of operating them by using separate software tools. The reason for it being so expensive was because of it being the sole operator in the software testing realm.
