Like any mig welding video, it includes the obligatory CVA safety instruction at the beginning but welding safety really is important and I think we have all come to expect it in any training video. This mig welding video DVD includes a menu with chapters so that certain topics are readily found without having to fast forward or rewind a lot.

Mig Welding Video - This one is one of the Best I have seen

To MIG weld aluminum thinner than 14 gauge (.074 inch), it may be necessary to use specialized pulsed MIG or AC TIG welding equipment. Keep it clean: Aluminum should be thoroughly cleaned prior to welding, including the removal of any lubricants from the material. Oxide removal should be done after degreasing using a stainless wire brush — either a hand wire brush or a cup wire brush will work.

How to Successfully MIG Weld Aluminum [Guide]

Insulate yourself from the welding circuit by using dry and undamaged protective clothing. Do not work on a wet surface. Do not use damaged welding cables. Do not place the welding gun or earthing clamp on the welding machine or other electrical device. 2.6 Welding Fumes Make sure ventilation is sufficient.
