Moto Pogo enters the one-wheeled electric scooter marketplace

Pogo Stick Effect As the name implies, this is a condition in which the motorcycle bounces up and down like a pogo stick. The root causes are usually under-inflated tires, ineffective rebound damping (often combined with soft springs) and out of round tires.

Motorcycle Handling Problems and Suspension Set-Up

Furthermore, if you can achieve the damping curve that is needed, it does not matter what brand name is on the component. Often with stock components, when you turn the adjusters full in or out, you do not notice a difference. In part, this is due to the fact that the manufacturer has put the damping curve in an area outside of your ideal range.
