Properties of water worksheet. Name _____ Class: _____ 1. Write the chemical equation for water, and draw a Stick model of a water molecule. 2. Sketch a space filling model of a water molecule, show polarity by label positive and negatively charged regions of the molecule. 3. What is a polar molecule? 4.

Properties of water worksheet - McQuades Biology Connection

Water covers about 70% of Earth's surface and it makes up 65-75% of our bodies (82% of our blood is water). Even if water might seem boring to you-no color, taste, or smell-it has amazing properties that make it necessary for supporting life. 1. How many hydrogen atoms are in a molecule of water?

Properties of Water

Cohesion. Water transport in plants. Water has a high specific heat capacity. specific heat capacity = amount of energy required to raise temperature of 1 g of water by 1°C (1 calorie, 1 cal) Large bodies of water stabilize the air temperature.

II. Properties of Water

The structure of the water molecule gives water unique properties. Water is a polar molecule, which means that it has a region with a slight negative charge (the oxygen atom), and a region with a slight positive charge (the hydrogen atoms). The oppositely charged regions of water molecules interact to form hydrogen bonds.
