Farm animals, however, are slaughtered well before the decrease in fertility levels. Secretion of the gonadotropins FSH and LH and their hypothalamic-releasing factor, hormone LHRH, begins during...

**Reproductive Cycles: Hafez/Reproduction in Farm Animals**

Although asexual reproduction occurs in many invertebrate species, most reproduce sexually. The basic unit of sexual reproduction is a gamete (sperm or egg), produced by specialized tissues or organs called gonads. Sexual reproduction does not necessarily imply copulation or even a union of gametes.
