### LADDERS & STAIRWAYS - ClickSafety

A ship's ladder is a specific style of stairway initially used on ships. Since ships have limited deck space, ship builders had to design stairs with unusually steep slopes. These stairs became known as ship's stairs or ship's ladders. The Occupational Safety and Health Administration calls these stairs ...

### OSHA Rules & Regulations on Ship's Ladders | Legal Beagle

As nouns the difference between ladder and stairs is that ladder is a frame, usually portable, of wood, metal, or rope, used for ascent and descent, consisting of two side pieces to which are fastened rungs: cross strips or rounds acting as steps while stairs is (label) a contiguous set of steps connecting two floors. As a verb ladder is (firefighting) to ascend a building or wall using a ladder.
