have a faulty turn signal module or a bad turn signal button/switch, remove it from the switch housing and check for continuity, check your wiring and connections from the turn signal switch to the turn signal module with a testlite.

### **SOLVED: Turn signals left side not working 1996 Sportster ...**

Harley 1200 C Sportster 2000 Mod: Left turn signal lights work fine. Right rear will not work on "lights on" or directional signal actuated. Front Right directional signal will light up the top (high) light bulb element, with "lights on" only, will not blink with turn signal actuated and will not light up bottom (low) bulb element at all.

## **Harley Davidson turn signal problem - YouTube**

If your neutral indicator light is not working it could be three things. One, the bulb in the indicator is bad. Two, the wires have come off the neutral switch in the transmission. Or, Three, the neutral indicator switch on the transmission is bad. Look at the chrome cover on top of the transmission on the right hand side of the bike. There is a switch with two wires running to it.

With new bulbs installed and sockets cleaned, I've narrowed the problem down to either the left turn signal switch or the turn signal module.

### **Turn Signal Not Flashing | Fix My Hog**

On my 95 once I installed these generic small turn signals meant for crotch rockets. The signals worked when at idle but the left one occasionally would go solid with the indicator. While riding the signals would not work and go solid except at the stoplight (back to idle). I put the stock ones back on and all was o.k.
